

New Hanover Regional Medical Center

Supplies: 24-hour urine specimen container and collection hat.

Instructions:

1. Urinate into toilet. Empty bladder completely. Write down time (this is the start time).
 - a. *Do not collect the first urine.*
2. Collect all urine in the specimen container for the next 24 hours.
3. Label the container with the following information:
 - a. Patient First and Last Name,
 - b. Patient Date of Birth,
 - c. Start date and time,
 - d. End date and time

IMPORTANT NOTE: Urine must be kept cold. Keep the specimen container on ice or refrigerated during the 24 hour collection period. Keep the container out of reach of children.

4. Deliver the container to one of our Outpatient Laboratory Services listed below, as soon as possible.
